WORK IN PROGRESS

- [1] **Back to Normal in the Euro Area: Convenience Yields and Short-Sales Costs** (joint with S. Corradin)
We study the positive co-movement between the convenience yield of German sovereign bonds and their specialness in the repo market during the ECB's QE and the normalisation period in 2022.
- [2] **Sovereign Bond Market Fragmentation and Monetary Policy in the Euro Area** (joint with E. Moench)
We study how cross-country sovereign bond market fragmentation modulates the average effects and the dispersion of effects of common monetary policy across member states in the Euro Area.
- [3] **The Short-Term Effects of Monetary Policy: Evidence from the UK** (joint with L. Brandt, J. Fischer, S. Miranda-Agrippino, and F. Pallotti)
We use a Bayesian structural VAR to study the speed of the transmission of monetary policy to economic activity in the UK, exploiting a novel dataset of daily private credit- and debit-card spending, online prices, and posted vacancies.
- [4] **Monetary Policy and Public Procurement**
I study how public procurement interacts with the transmission of monetary policy to asset prices and firm-level investment among publicly-listed US companies.
- [5] **Fiscal News and the Macroeconomy** (joint with T. Walsh)
We study how news about the government's current and future fiscal stance affects the macroeconomy using high-frequency responses of financial markets to periodic and comprehensive fiscal announcements in the United Kingdom.
